**“I went into medicine because I wanted to combine my skills of empathy and relatability to positively impact the health of my community.”**

### About Anthony Healy, MD

Dr. Anthony Healy has always known that he wanted to pursue a career in healthcare. “I went into medicine because I wanted to combine my skills of empathy and relatability to positively impact the health of my community,” he says. Dr. Healy actively listens to his patients and treats them like family. He wants them to know he is on their side. “I ask what they are and are not willing to change about their health and how I can help,” he explains. If he could change anything about healthcare today, he would lower the cost of specialty care and make primary care more accessible.

When not with patients, Dr. Healy loves cooking, exercising, spending quality time with his wife and children. He also enjoys playing and watching soccer.
