“My patients have never been just a number for me. I take pride in individualizing the care for each patient.”

About Robyn Odzark, DO

To Dr. Robyn Odzark, there is “no greater reward than seeing patients fulfilled with their quality of life.” She enjoys forming connections with patients and finds value in listening to them. “Everyone comes in with different experiences that have shaped who they are,” she explains. She views herself as a partner in her patients’ health goals. “My patients have never been just a number for me. I take pride in individualizing the care for each patient,” she says. She adds, “I love being able to celebrate their successes, coaching them through difficult times, and being their advocate when they don’t know where to turn.”

In her free time, Dr. Odzark enjoys time with family. She loves home improvement projects and trying anything new.
