“While I understand that I cannot always walk in their shoes, I will walk beside and guide them through their beautiful journey.”

About Chandel Baty, DNP, APRN, FNP-C

Dr. Chandel Baty was inspired by the healthcare professionals caring for her during a hospitalization as a teenager. “I wanted to grow and learn as much as I could about the healthcare process,” she says. Her favorite part of her profession is “the constant state of learning and adapting.” She strives to treat patients like family and loves caring for her senior patients. “While I understand that I cannot always walk in their shoes, I will walk beside and guide them through their beautiful journey,” she says. If she could change anything about healthcare today, she would remove barriers, increase access, and lower costs.

In her free time, Dr. Baty loves spending time with her husband and dog. She also likes reading and traveling.
