“I love working with my patients, my care team, and other specialists with the common goal of improving someone's daily life and overall health.”

About Daniel Canby, MD

Dr. Daniel Canby was inspired to work in healthcare after serving as a research assistant and conducting interviews with seniors about their healthcare experiences. “I met many seniors who showed me the great value of a strong patient-doctor relationship,” he says. These relationships are his favorite part of his profession. “I love working with my patients, my care team, and other specialists with the common goal of improving someone’s daily life and overall health,” he explains. Open communication is an important part of his practice, and he strives to help patients feel “heard, understood, and empowered.”

In his free time, Dr. Canby enjoys cooking, baking, and visiting museums. He also loves swimming and going to the beach.
