“I am meeting people where they are, and we are establishing their plan of care together. This approach improves outcomes and allows patients to be empowered to invoke change in their lives.”

About Deneda Daye, MSN, FNP

Growing up, Deneda Daye knew she wanted to follow in her mom’s footsteps and become a nurse. “I love people and treat everyone like my family!” she says. She has always has a special connection to the senior population, whether that be seniors at her church or patients she met while working as a Candy Striper. She always approaches patients as her “true, authentic self.” She adds, “I am meeting people where they are, and we are establishing their plan of care together. This approach improves outcomes and allows patients to be empowered to invoke change in their lives.”

When not caring for patients, Deneda Daye loves enjoying quality time with her family and friends. She also has a Master of Divinity degree.
